**The MOST  
COMPREHENSIVE  
Decompression  
System Available.**

DYNATRONICS

# Play Before You Pay!

Take our proven marketing program for a test drive. Play our DVD in your waiting room and experience the results. No need to gamble - you sell the services before you buy the system!

## DynaPro Marketing Kit

More than just Decompression – Every DynaPRO System comes standard with a 26" LCD/DVD flat-screen T.V. and a comprehensive marketing program proven to generate NEW PATIENTS.

*Additional marketing items include:*

- Waiting-room DVD
- Patient brochure
- Series of ads on CD (color/b&w)
- Waiting-room display
- Core stabilization program
- Decompression Nutrition Packs

### YOUR SINGLE SOURCE FOR ALL CLINICAL PRODUCTS AND SERVICES

Dynatronics, manufacturer of the broadest line of rehabilitation products in the industry, offers local training, support and service.

# DynaPro's 4-Phase Treatment Provides Greater Results Than Traditional Decompression

**Cervical** - Pre-treat each spot for 30 seconds with the D881 Light Probe (1,000mW).

**Lumbar** - Pre-treat for 9 minutes with the unattended XP Light Pad (7,500mW).

## PHASE 1 - Light Therapy

By pre-treating with Light Therapy prior to beginning Decompression, the patient benefits from relaxation of muscle spasms, increased circulation, and relief of minor muscle and joint aches. The DynaPro system includes both a Light Probe and an unattended 8" x 10" Light Pad (*an industry exclusive*) for treating both the cervical and lumbar regions.

## PHASE 2 - Targeted Decompression

Following Light Therapy, Phase 2 consists of decompressing the intervertebral discs relieving pressure on structures that may be causing low-back or cervical pain.

**Herniated Disc**

**Healthy Spine**

The DynaPro Spinal Health System has been cleared by the FDA to relieve pain associated with herniated discs, protruding discs, degenerative disc disease, posterior facet syndrome, and sciatica.

Every DynaPro System comes standard with a Cervical Decompression Module.

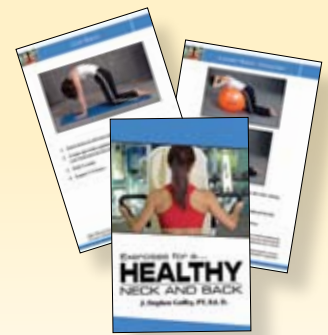

Our DynaWrap Belt System makes patient set-ups quick and easy.

The DynaPro automatically calculates & digitally displays the rope angle allowing for Targeted Decompression (*an industry exclusive*).

### PHASE 3 - Core-Stabilization Exercises

Once pain has diminished, it is recommended that the patient begins an exercise program to strengthen supportive core muscles and improve flexibility.

Each DynaPro™ System comes standard with a comprehensive exercise manual and on-board tutorials by **J. Stephen Guffey, PT, Ed. D.**

### PHASE 4 - Decompression Nutrition Packs

**Decompression Pack** - During the first 30-60 days of decompression therapy, the Decompression Pack provides patients with all-natural supplements that relieve pain, inflammation, muscle spasms, tension, and aides in the repair of soft-tissue injuries.

**Neuro Pack** - Helps repair injured nerve tissue, facilitates nerve transmission, and reduces pain and inflammation.

**Disc/Joint Pack** - Provides an effective treatment for reducing joint pain and chronic inflammation, rebuilds cartilage, and increases joint resilience and flexibility.

*These statements have not been evaluated by the FDA. These products are not intended to diagnose, treat, cure or prevent disease.*

**Nutura™** - The first nutritional program designed specifically for decompression and increased patient results!

## TAX BENEFITS

*You may qualify for significant tax savings*

**LEASE financing available for as low as \$350/mo. OAC**

### IRS Section 44 Tax Credit

This tax credit is available to businesses that have total revenues of \$1,000,000 or less in the previous tax year or 30 or fewer full-time employees. This credit can cover 50% of the eligible access expenditures in a year up to a maximum credit of \$5,000.

### IRS Section 179 Tax Deduction

Under IRS Section 179, equipment purchases up to \$250,000 can be expensed (*deducted from taxable income*). Finance leases (*\$1.00 buyout*) qualify for this deduction in their year of inception.

*Dynatronics Corporation does not give tax advice. Therefore, you should consult your tax professional for specific information regarding the IRS Section 44 Tax Credit and the IRS Section 179 Tax Deduction.*
