Dynatronics Receives 180-Day NASDAQ Extension

SALT LAKE CITY, December 10, 2009. Dynatronics Corporation (Nasdaq: DYNT) today announced that following last month's panel hearing, NASDAQ granted Dynatronics a full 180-day extension for regaining compliance with the \$1.00 minimum bid requirement.

"We are pleased the panel granted us the full 180-day extension we requested," stated Kelvyn H. Cullimore Jr., chairman and president of Dynatronics. "This will allow time for the market to consider important positive announcements we have recently made as well as additional positive announcements expected during the extension period. We believe the good financial results from our year ended June 30, 2009 combined with the trend of five consecutive profitable quarters provide important momentum going into this extension period. We will also have the opportunity during the extension period to report our financial results for the quarter ending December 31, 2009. We trust these factors will all help us move toward regaining compliance with the NASDAQ requirement."

Dynatronics manufactures, markets and distributes advanced-technology medical devices, orthopedic soft goods and supplies, treatment tables and rehabilitation equipment for the physical therapy, sports medicine, chiropractic, podiatry, plastic surgery, dermatology and other related medical, cosmetic and aesthetic markets. More information regarding Dynatronics is available at <http://www.dynatronics.com>.

This press release contains forward-looking statements. Those statements include references to the company's expectations and similar statements such as the statement regarding the opportunity to make future announcements and move toward regaining compliance with NASDAQ's minimum bid requirement. Actual results may vary from the views expressed in the forward-looking statements contained in this release. The development and sale of the company's products are subject to a number of risks and uncertainties, including, but not limited to, changes in the regulatory environment, competitive factors, inventory risks due to shifts in market demand, market demand for the company's products, availability of financing at cost effective rates, and the risk factors listed from time to time in the company's SEC reports including, but not limited to, the report on Form 10-K for the year ended June 30, 2009.
